Severity	Definition
Error	Channel issue that will block channel from passing certification.
Warning	Channel issue that does not block certification, but may be reported as an Error in the future.
Info	Helpful information about your channel detected during testing.

## Static Analysis Results

Static Analysis checks the code in your package for errors in the structure or syntax.

Severity: [All Severities ▾](#) Category: [All Categories ▾](#)

#	Message	Severity	Category	Certification requirements
1	We have found a proper integration of an Automatic Account Link in your channel code, but you have not selected Customer Account Requirement in channel submission properties via Developer Portal.	Warning	Uncategorized	<a href="https://developer.roku.com/docs/develop-per-program/certification/certification.md#certification-criteria-1">4.2 (https://developer.roku.com/docs/develop-per-program/certification/certification.md#certification-criteria-1)</a>
2	Channels that have streamed more than an average of 5 million hours per month over the last three months or you have a new channel projected to reach the specified streaming hour threshold shortly after launch, you must participate in Roku's Continue Watching program. See Continue Watching for more detail. TVOD, live linear, and made-for-kids channels are excluded from this requirement.	Warning	Uncategorized	<a href="https://developer.roku.com/docs/develop-per-program/certification/certification.md#certification-criteria-1">4.13 (https://developer.roku.com/docs/develop-per-program/certification/certification.md#certification-criteria-1)</a>

3	Channel version wasn't updated.	Warning	Manifest	<a href="https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1">6.1 (https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1)</a>
4	"/images/channel.jpg" image used for "mm_icon_focus_hd" attribute has invalid resolution: "540x405". Valid resolution is "290x218". Path: /manifest. Line: 20.	Warning	Manifest	<a href="https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1">6.4 (https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1)</a>
5	RAF usage was found in BrightScript code but Ads revenue was not specified during channel publishing.	Warning	Raf	<a href="https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1">1.1 (https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1)</a>
6	Billing usage was found in BrightScript code but was not specified on the Monetization channel properties page.	Warning	Billing	<a href="https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1">2.1 (https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1)</a>
7	For your channel to pass certification, your application must fire the "AppDialogInitiate" and "AppDialogComplete" beacons if the channel UI displays a login, user selection, EULA, or any other dialog before the home page.	Warning	Performance	<a href="https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1">3.2 (https://developer.roku.com/docs/development/per-program/certification/certification.md#certification-criteria-1)</a>
8	Following BrightScript libraries are required by the channel: roku_ads_lib. Path: /manifest. Line: 8.	Info	Manifest
